Sybil: Or, The Two Nations

A Tale of Two Nations Five freshly decapitated human heads are thrown onto a crowded dance floor in western Mexico. A Mexican drug cartel dismembers the bodies of a rival and then stitches his face onto a soccer ball. These are the sorts of grisly tales that define the media, infiltrate movies and TV shows, and ultimately shape America's perception of Mexico as a dangerous and scary place, overrun by brutal drug lords. Without a doubt, the drug war is real. In the last six years, over 60,000 people have been murdered in narcos-related crimes. But, there is far more to Mexico's story than this grim narrative would suggest. While drug cartels have grabbed the headlines, Mexico has undergone an unprecedented and underpublicized political, economic, and social transformation. In her groundbreaking book, Two Nations Indivisible, Shannon K. O'Neil argues that the United States is making a grave mistake by focusing on the politics of antagonism toward Mexico. Rather, we should wake up to the reality of prosperity and new opportunities unfolding there. The news that isn't being reported is that, over the last several years, Mexico has become a real democracy, providing its citizens with a voice. The borders that aren't being crossed are the borders of theallet in a political life. Between Two Nations is the first qualitative study of how new immigrants assimilate into American political life. Jones-Correa reexamines assumptions about Latino politics and the diversity of Latino populations in the United States, about the role of informal political in immigrant communities, and about gender differences in approaches to political activity.

A Tale of Two Nations The Preoperative Course in Reading

Most of the papers in this book were presented during the 9th International South Sudan and Sudan Studies Conference of the Sudan Studies Association USA and the Sudan Studies Society UK. 150 scholars from numerous academic disciplines, experts in conflict transition and development, staff of Non-governmental Organizations (NGOs), former and current senior officials from ministries and military institutions from Sudan, South Sudan, and seventeen further countries participated in the conference. They engaged in vivid discussions on historical and recent socails in the region of Sudan and South Sudan, inequality and exclusion in numerous variations, and on rapid social change accompanied by uncertainties and land conflicts. The awareness about the necessity of the separation and the importance of certain steps has been increased. They used technical approaches to understand the new and the interrelations between them were also scrutinized. The participants internally exchanged views and experiences on the difficulties and successes in taking responsibility rather than being dependent on foreign assistance. Discussions revealed strong potential in both societies to overcome such problems, to initiate processes of reconciliation, and to consolidate peace. They shall light on the complex processes of nation-building and the creation of meaningful constitutions. This book attempts to capture at least some of this multitude of insights and aspects that had shaped the conference.

After surviving the shock of his reconnaissance plane and his capture on May 1, 1960, Powers spent sixty-one days of rigorous interrogation by the KGB, a trial that, a conviction for espionage, and the drat of a year sentence. In the years that followed, the U.S. government attempted to distance itself from this stain on its international prestige. But in the 1980s, President Ronald Reagan's Cold War policies brought about a new national sensibility about the role of CIA in the U-2 incident.

A merican democracy is far apart in their ability to achieve the American dream. Why, despite continued efforts to increase understanding and expand opportunities, do black and white Americans still lead separate lives, continually marked by tension and hostility? In his much-lauded classic and updated version reflecting the changing realities of race in our nation, Al Anawat explores the origins and meaning of racism and clarifies the conflicting theories of equality and inferiority. He painstakenly pictures of racial inequality in America—focusing on family life, education, income, and employment—and explores the controversies over politics, crime, and the causes of the gap between the races. Reasoned, accurate, and devastating, Two Nations demonstrates how this great and dividing issue has defined America's history and the political reality will play in the future.

Palestine Israel: A Just Plan for Permanent Peace Why should you care about Israel? Part two, "Striving to Make the Middle East More Easy," presents seven facts about Israel and the spiritual roots behind the Middle East conflict. Part three, "Maximizing the U.S. Role," is a call to action and prayer for the American church regarding the future of Israel. Between Two Nations Few political phenomena have proved as confusing or as difficult to comprehend as nationalism. There is no established consensus on its identity, genesis or future. Are we, for example, in the process of being thrust back into the competitive and aggressive world of imperialist nationalism? Or, rather, are we being flung headlong into a new, globalized and supra-national millennium? Has the nation-state outlived its usefulness and exhausted its progressive and emancipatory role? Opening with powerful statements by Lord Acton and Otto Bauer—the classic liberal and socialist positions, by the renowned historian Eric Hobsbawm, provocative theorist Tom Nairn, and the outstanding political philosopher Jürgen Habermas discuss, with varying degrees of optimism and pessimism, the future of the national project.

The National Endowment for the Humanities, political and philosophical radical, Martin Luther (1483-1546) was actively committed to a fundamental economic, political and social reconstruction of humankind as well as to the pursuit of international peace. In his voluminous writings on a wide range of social and political issues, Martin Luther argues that the State has a vested interest in the well-being of the people and that the people have a right to be free from the unjust power of the State. In his ‘Sermon on the Law and the Gospel’ (1543), Martin Luther asserts that the State is a servant of the people, and that the people have a right to demand that the State act in their best interest.
